## WG Industrial X-Ray NDT Solutions

Westminster has a wide range of industrial technical solutions which have a modular design with a high level of customisation according to specific customer requirements. This Industrial X-ray inspection system has been designed for non-destructive material testing for the automotive, electronics and aircraft industry or for ship and vessel construction manufacturing to provide a process to guarantee highest quality and safety standards for industrial products.

We are realising any of your ideas to the customer-focused solution within any stages of your production cycle.

### RANGE OF ADVANTAGES

- Sophisticated proprietary image analyzing algorithms which allows to realize reliable automatic detection systems of non-conformities.
- Statistics, computer assisted measurement, post-analysis, remote workstations, archiving, integration into customer's network and production management systems.
- Modular design, broad range of accessories and options for maximum compliance with customer's production and quality assurance processes
- Flexibility and compact design our industrial installations can be adopt into the most manufacturing chains in combination with operator or automatic control.
- Ultralow radiation dose is an effective solution for scanning different automotive parts loaded on the hanging conveyor line.
