Wall mounted or stand alone

Throughput of 50-60 people per minute

100% safe

Overview

This WG Walk-By Metal & Mobile Phone Detector is a rapid deployable solution for the detection of contraband items located on or within body cavities.

The easy to deploy system can has a throughput of 50-60 people per minute. It can function in both horizontal and vertical positions in order to screen people and their belongings.

The system can detect mobile phones when on or off, and anywhere on the person or in body cavities. The WG 500 can be placed out of view behind objects, doors and walls made of concrete, drywall, cinder block and steel studs. It is ideal for surprise and covert screenings.

The unique single pole design and long-life battery provides versatility of mobile searches at any location.

The combination of the visual alert system and audio alerts makes detection easy for operators, however the system can be operated in stealth mode, allowing the device to work without the lights on.

Features

- Fast throughput
- Versatile
- Easy to deploy
- Covert screening
- Safe and non-emitting
- System integration
- Maintenance free

Controls

- Audible alarm on/off control
- On/ Off push button
- Sensitivity control for red alert

Power Supply

- Battery – 12V DC 4.5A h sealed lead acid,
100/ 240V AC battery charger
- Battery Run Time - 10 – 16 hours on full charge
- Charge Time – 4 hours
- Charging Ports - 1 on front of unit, 1 on bottom of unit

Temperature Range

-10°C - +50°C | +14°F- +122°F

Relative Humidity

0 – 95%NC

Weight

- Unit – 19.8 lbs
- Base – 19.8 lbs

Dimensions

- Unit: W13.46 cm x D8.64 cm x H182.12 cm
- Base: W34cm x D34cm x H36cm

Wall Mount Profile

9.14 cm
